**7:30PM California's Gold - Arrowhead Springs**

It appears on the southern slope of the San Bernardino Mountains. Over the years it has been the subject of a host of Indian legends. In fact, no other natural landmark in those mountains has been regarded with such awe and wonder. We're referring to the "Arrowhead," a near-perfect natural 7 1/2 acre arrowhead-shaped landmark formed by the contrast of light and dark vegetation which has been clearly visible for hundreds, possibly thousands, of years. In this adventure, Huell Howser and cameraman Luis Fuerte not only travel to the famous Arrowhead itself, but also visit the once world-famous Arrowhead Springs Hotel which was one of the favorite hideouts for Hollywood stars back in the 1940's and 1950's. This entire area is known for its many hot springs and, in fact, water rushes everywhere, from flowing fountains to gurgling springs. Twenty-nine springs are located here, some cold and some as hot as 196 degrees! These hot springs, which hold the record of being the hottest in the world, heat the mineral baths, the almost forgotten "steam caves" located underneath the old hotel, and the cabana pool which was built for Olympic and film star Esther Williams in 1944. The beauty of the area and the hot springs themselves have made this a popular destination since the days of the earliest Indian communities. It's a place filled with natural and human history and a

**8:00PM Nature - Attenborough's Wonder of Song**

David Attenborough presents seven of the most remarkable animal songs found in nature and explores the significance of these songs in the lives of their species. Each one - from the song of the largest lemur to the song of the humpback whale to the song of the lyrebird - was recorded in his lifetime. But will they soon be heard no more? Contrary to Charles Darwin's theory of sexual selection, a new generation of scientists have discovered that animal song is not just the preserve of males. Females sing too. But there are also fears that we do not have much longer to hear them. Because as humankind gets noisier, the rest of the planet is falling silent. Joyous, surprising and poignant, this story of pioneering research and astounding insight is a chorus of wonder and a wake-up call. (Next Air 05/04/2023 12:00AM)

**7:30PM California's Gold - Shasta Dam**

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about Shasta Dam which, is a perfect example of "California's Gold". Construction of the dam started in 1938 and ended in 1945. It's 602 feet high, 883 feet thick at the bottom, 30 feet thick at the top, and 3,460 feet long. The face of the dam is as big as six football fields and the spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. There are 18 outlets on the face of the dam, each big enough to drive a pickup through. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. It is the people who built the dam, the people that poured concrete 24 hours a day for 5 1/2 years and the countless other jobs that make this structure such a gem. Huell meets several of the

ALTERNATIVE FACTS: The Lies of Executive Order 9066 tells the untold story of false information and political influences which led to the World War II incarceration of Japanese Americans. The film also examines the parallels to the targeting of groups today and similar attempts to abuse the powers of the government.

**10:00PM And Then They Came for Us**

As the documentary, And Then They Came for Us, demonstrates, the registration and incarceration of 120,000 Japanese Americans during WWII was one of the worst violations of constitutional rights in American history. The US government lied about the threat of espionage to justify the incarceration. Today's Muslim travel ban relies on similar uncorroborated claims of threats to national security. Featuring actor George Takei, and many others who were incarcerated, the film reveals the silence that surrounded the incarceration and the importance of speaking up against the travel ban. Knowing our history is the first step in making sure we do not repeat it. This film is a cautionary tale for these dark times.

**7:30PM California's Gold - Salt**

Our Golden State is full of many of unique things, and those of you who have been to San Fransisco have noticed huge ponds filled with water that ranges in color from deep red to light pink. We decided that we just had to get to the bottom of this California Mystery. When we finally arrived at the "ponds" we found one of California's most unique agricultures. Salt and brine shrimp are what is responsible for our crimson ponds. 300,000 tons of salt a year to be exact. Salt has been harvested from these ponds since the Gold Rush and has been a very important part of our states history. Cargill Salt has to be one of the strangest and most beautiful places we have been, and here are a few of the things we found: salt stacks 90 feet high and 880 feet long, hundreds of salt ponds called crystallizers that average 20 to 40 acres in size and one of the few private railroads in the U.S. With over 14,000 different uses for

**10:00PM Fanny: The Right to Rock**

Sometime in the 1960s, in sunny Sacramento, two Filipina American sisters got together with other teenage girls to play music. Little did they know their garage band would evolve into the legendary rock group Fanny, the first all-women band to release an LP with a major record label. Despite releasing five critically-acclaimed albums over five years, touring with famed bands from Slade to Chicago and amassing a dedicated fan base of music legends including David Bowie, Fanny's groundbreaking impact in music was written out of history... until bandmates reunite 50 years later with a new rock record deal. With incredible archival footage of the band's rocking past intercut with its next chapter releasing a new LP today, the film includes interviews with a large cadre of music icons, including Def Leppard's Joe Elliott, Bonnie Raitt, The Go-Go's Kathy Valentine, Todd Rundgren, The Runaways' Cherie Currie, Lovin' Spoonful's John Sebastian, The B52's Kate Pierson, Charles Neville and David Bowie guitarist and bassist Earl Slick and Gail Ann Dorsey. Fighting early barriers of race, gender and sexuality in the music industry, and now ageism, the incredible women of Fanny are ready to claim their hallowed place in the halls of rock 'n' roll fame. **7:30PM California's Gold - Hidden Alcatraz**

Most of us have seen one of the countless films based on Alcatraz, from the Birdman to Clint Eastwood and his Escape From Alcatraz. Over a million people every year take the ferry through the thick San Francisco fog to walk the cell blocks that housed the likes of Machine Gun Kelley and Al Capone. As usual Huell wasn't satisfied with the regular tour and went in search of the "Hidden Alcatraz". It got its name from the Spanish word Alcatrazes, or Bird Island and didn't see human inhabitants until the US Military took it over in the mid 1800s. During the Civil War it was used as a prison for Southern privateers. After the more modern prison was built in the 1930s, the old Civil War prison was covered over and virtually forgotten. Join Huell and Luis as they go under Alcatraz and discover the labyrinth of tunnels and caves that honeycomb "The Rock". The remnants of our state's rich history are finally uncovered in this very special

**11:00PM Woodsongs - George Winston and Cutter Elliott**

GEORGE WINSTON is one of the legendary pianists in America. He grew up in mainly Montana but spent formative years in Mississippi, and Florida. Inspired by R&B, jazz, blues, and rock (especially the Doors) he started playing the organ in 1967. Switching to an acoustic piano in 1971, he sold 15 million albums. His latest album, Night, is a collection of songs recorded at five different studios. CUTTER ELLIOTT has proven the doctors who said he would never walk, talk, or play guitar... very wrong. Born eight weeks premature and diagnosed with cerebral palsy, autism, and partly blind and deaf, his disabilities have turned into superpowers. He's now using his gifts to help archive and preserve the traditional sounds of country music. His newest album is titled Heartache Waiting to Happen. WoodSongs Kid: The Wallace Sisters are three sisters, Mia (16), Audrey (15), and Adrianna (13) from Lexington, KY who specialize in acapella.
