

READ

You can go on your own learning adventures every day with PBS KIDS! Summertime is a great time to help your child explore new worlds, new characters and new ideas. Here are a few tips to help you explore through reading and language all summer long.

- Share stories! Share a story with your child, then ask them to share one with you.
- Get creative. Design your own artwork or illustrations to go with some of your favorite stories. You can try drawing, painting, sculpture, or mixed media. Ask your child about what they've created and why they included different elements, images, and features.
- Find words and letters around you. Make challenges for yourself. How many words can you find with the letter "s" today? Tomorrow, you could search for words starting with "t."
- Take advantage of the great outdoors. Have your child record, in words or drawings, their observations. They'll be building language and science skills at the same time.
- Sing songs together. Share some of your favorites or make up silly versions to tunes you all know.
